Problem Description:

> (*Game: hangman*) Write a JavaFX program that lets a
> user play the hangman game. The user guesses a word by
> entering one letter at a time, as shown in Figure
> followings. If the user misses seven times, a hanging
> man swings, as shown in Figures. Once a word is
> finished, the user can press the *Enter* key to continue
> to guess another word.

   Figure 22.23

The program plays a hangman game.

Your program will read the following words:
 Programming, Java, Is, Fun, (or any word that you choose)

Upload:
   1) Java source code
   2) Screen shot for each step

Without Java source code and screenshots, your homework will not be graded.
